---

Dear Valued Customer,

We appreciate your support of our new, breakthrough .224 Valkyrie caliber. This award winning product pushes the boundaries of long range shooting and is the first 1,300-yard supersonic MSR-15 cartridge. We've been extremely pleased with the adoption of this round and thank you for joining the many shooters who are now shooting .224 Valkyrie.

As with any product innovation that pushes performance boundaries, there are often adjustments that need to be made to the offering to continually improve. We have found that some of our Sierra 90-grain MatchKing rounds are not performing to the accuracy levels we expect. Although they are still shooting MOA out of our test barrels and will function to our specifications, we hold our Premium Gold Medal products to the highest standard. As a result, we are recommending the following products as we work to improve the MatchKing load.

- AE224VLK1: American Eagle 75-grain TMJ
- F224VLKMSR1: Fusion 90-grain Bonded Soft Point
- P224VLKBT1: Premium Nosler 60-grain Ballistic Tip

We're excited to let you know that more Gold Medal offerings are in development and will be announced later this year.

Keep pulling the trigger and supporting the shooting sports!

Sincerely,

Jason Vanderbrink  
President
